

# Recent Trends in Rheology: From Soft Matter to Plastics Processing

Annual Meeting of the German Rheological Society (DRG)

**12. and 13. September 2024**

BASF SE, Ludwigshafen

The German Society of Rheology (DRG) is organizing a symposium on September 12 and 13, 2024 to disseminate novel results in the field of rheology. The symposium is thematically open. Oral and poster contributions are welcome in all areas of rheology and applications of complex fluids, including polymer solutions and melts, colloidal suspensions, foams, emulsions, biological or food materials. The symposium will cover experimental, analytical and numerical results, including both academic and industrial research. In particular, young scientists are encouraged to present their work and share their findings with the rheological community. Lectures can be presented in German or English, while slides and abstracts should be prepared in English.

A special session is devoted to lectures of members of “die junge Rheologie (djR)”. The awardee of the “Rheologie-Preis” will be also announced during the symposium.

The German Rheological Society is looking forward to meeting you at BASF SE in Ludwigshafen.

**Abstract submission** until **March 31, 2024** via e-mail to [drq@bam.de](mailto:drq@bam.de)

Please use the available template from the website [drq-rheologie.de](http://drq-rheologie.de)

## Registration

Please register online at [drg-rheologie.de](http://drg-rheologie.de)

## Registration Fees

DRG members	250 €
Non members	280 €
Students and retired DRG members	180 €

Registration fee includes conference materials, lunches and coffee breaks.

A tour in the BASF Analytical and Material Science labs will be organized.

## Organizers

Board of the German Rheological Society (DRG)

For questions, please contact [drg@bam.de](mailto:drg@bam.de)

## Venue:

BASF Feierabendhaus

Leuschnerstr. 47

67063 Ludwigshafen am Rhein
